

1. Select the link appropriate for your operating system to download the Secure Browser software.
2. Go to your Downloads folder and select “nycb_browser64.exe” or “nycb_browser32.exe” or “nycb_broswer.pkg” (file name is based upon selected operating system)
3. Click Next on the installation screen

4. Click Next

5. Click Install

6. The PC or Mac will restart and the application will launch. If the application does not launch double click on the icon installed on your desktop.
